The late Sir Isam Holden, who died recently in England at the age of nine-ty-one, thad an interesting curser. He was the son of a working miner, and began work himself at the age of ten, but his thirst for knowledge led him to selze every apportunity of study. Ho Invented the lucifer match while teaching in a school at Reading. Before he was thirty he had made important inventions in woolen machinery, and he soon became the head of an enor nous manufacturing business which now employs four thousand workmen in its factories in England, France and Bolgium. His habits of life were simpie, and his conduct was shaped by strong religious convictions,

THE GREATEST MONEY POWER IN THE WORLD.

Between Them They Control \$2,000. 000,000 - In 1815 One of Them Made £5,000,000 in a Day by Getting the Exclusive News from Waterloo. P

as a Rothschild," has for a number of years throughout the civilized world been a typical expression for a man of im mense wealth. Others have shown equal talents for money making, to

be sure, as, for example, Barney Barnato, who recently committed suicide, and is said to have accumulated a fortune of \$300,000,000 within the last ten years. Or one might cite the late Jay Gould in our own country, who turned everything he touched to gold. But in the case of the Rothschilds, all the different banking houses conducted by the separate members support one another in great transactions, so that they are practically one at need. As they represent or control in total more than \$2,000,000,000, they may be set down as constituting the greatest money power in the world, says a writer in an Amer-

The founder of this clan of money kings, Mayer Anselm Bauer, was a money-lender and bric-a-brac dealer, who did business in the Jewish quarter of Frankfort, Germany, during the latter half of the eighteenth century, in a house which bore the sign of a red shield (Rothschild). This afterwards gave a name to the family, when Mayer Anselm began to acquire large wealth His great skill as an expert in coins and curios brought him the friendship of the Landgrave of Hesse-Cassel, who also made him his banker. At a later period it fell to him to be of great as-sistance to this German prince by concealing his treasure of jewels and plate at a time of crisis. He restored the full value of these with five per cent, inter-est, and thenceforward he became favorably known to European courts as ; financial agent always to be trusted. Before he died, in 1812, branches of the Frankfort banking house had been es tablished at London, Vienna and Naples, the Paris firm not being organized till the downfall of Napoleon and the establishment of the Bourbons.

The greatest financial genius of the Rothschild family, though there have been many of great talent, was Nathar Mayer, of the second generation, who established the house of N. M. Rothschild & Co., in 1798, in London. He flew to the stars, and grovelled in the mud for money. He welcomed all transactions, big or little, wherewith te turn the banker's penny. He was the most daring speculator of his time or the Stock Exchange, and the most suc He had carrier-pigeons and fast-sailing boats to bring him the sarliest news from the war centers of Europe, and so help him to manipulate stocks. He followed Wellington's army to Waterloo in person, and had re tays of the swiftest horses and a fas yacht lying in the harbor at Ostend Bo he arrived at the London Stock Exchange, after the battle, twelve hours shead of any public announcement of the victory, and made £5,000,000 by one of the most tremendous series of specalations in history. In 1810, when the Duke of Wellington, then commanding in Spain, drew on the English government for 13,600,000, and the English treasury was short. Nathan bought the drafts at a big discount, and at one sent the money. The stories about this remarkable man are almost encliess and show how strangely be was allied. and show how strangely he was alike squal to the most tremendous schemes and the pettiest tricks of avarice

The succession of this house fell to Lionel, the eldest son, who was the money maker, while the other three sons devoted themselves to pleasure and art collecting. One of these brothers was Anthony, the first English Rothschild to be knighted, and it was his daughter who married the present Earl of Roseberry, and presented her bridegroom on the morning of the nuptials with a cheque for £2,000,000, in closed in a gold box set with diamonds Lionel was made an English baron, but before he was elevated to the peerage he was elected many times to the house of commons. Each time, however, he was retired because he refused to take the oath "on the faith of a Christian. Finally parliament got fired of this curious farce, and a bill was passed permitting Jews to be sworn on the Old Testament. This removed the politi-cal disability of the ruce, in 1858, after a fight of eleven years.
